

India Pavilion in

WHX DUBAI

formerly Arab Health

9 – 12 February, 2026 | Dubai, UAE

EEPCINDIA
ENGINEERING THE FUTURE

Chairman's Pen

World Health EXPO - WHX (formerly Arab Health) Dubai 2026, is an unmissable exhibition uniting thousands of healthcare professionals under one roof to learn, trade, and network. From state-of-the-art imaging equipment to the most cost-effective disposables; developments in surgery to advances in prosthetics, the exhibition continues to be at the heart of healthcare in the Middle East. WHX is the Middle East's largest healthcare trade event offering unparalleled access to do business, learn, and network. WHX connects healthcare brands, people and ideas in a setting like no other to help bring tomorrow's healthcare to our world today.

UAE is one of the most developed economies in the Middle East. Driven by the country's location and increased government investment in the healthcare infrastructure, UAE's healthcare sector has witnessed strong growth and has also emerged as the regional medical hub for not only Middle East but also West Asia and North Africa. Therefore UAE offers significant scope for medical devices. Participation in Arab Health will provide significant benefits for the Indian exporters.

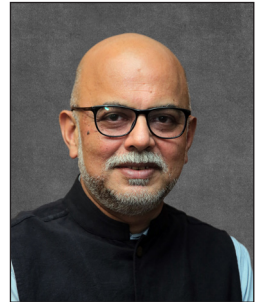

A handwritten signature in black ink, appearing to read 'Pankaj', followed by a long horizontal line and a small mark below it.

(Pankaj Chadha)
Chairman, EEPC India

ED's desk

I am glad that EEPIC India is mounting a team of Engineering exporters to WHX (formerly Arab Health) Dubai 2026 being held over 9-12 February, 2026. World Health Expo (WHX) is the world's largest network of healthcare events, where the brightest minds come together to shape the future of health. With 15 international events across the world, WHX connects people, governments, businesses, and ideas on a global scale, enabling discovery, innovation and opportunity.

World Health Expo, Dubai – formerly Arab Health – is where the world of healthcare meets to power healthcare globally. For over 50 years, it's been the meeting point for professionals who move the industry forward. As part of the world's largest network of international healthcare events, WHX Dubai connects you with the people, products, and ideas transforming care today. Join thousands of professionals for four days of meaningful connections and real outcomes.

The medical devices sector in India is a diverse mix of large multinationals, mid-sized firms, and emerging start-ups, making it one of the fastest-growing segments of the healthcare industry. Its growth is underpinned by strong innovation, with the sector increasingly attracting seed and venture capital funding. The market is projected to grow from USD 17.86 billion in 2026 to USD 44.76 billion by 2034, exhibiting a CAGR of 12.20%.

UAE is an important trading partner for India. The two countries share a Comprehensive Economic Partnership Agreement (CEPA) which was signed four years ago. Since the signing of the agreement, the bilateral merchandise trade has more than doubled from USD 43.3 billion in FY 2020-21 to USD 100.04 billion in 2024-25.

In engineering sector, UAE has been one of the top two export destinations for India during the current fiscal - April -December 2025. In 2024-25, India's engineering exports to the UAE stood at USD 8.3 billion which is 40.3% higher than the same period last year.

The total revenue earned by UAE's healthcare sector is expected to reach USD 1.9 million by 2030 growing at a CAGR of 9.7%.

UAE offers significant scope for medical devices. Participation in Arab Health will provide significant benefits for the Indian exporters and I wish the visiting team all success!

(Adhip Mitra)
Executive Director & Secretary
EEPC India

About EEPC India

EEPC INDIA 70 YEARS OF EXCELLENCE IN ENGINEERING EXPORTS

EEPC India has been the Face of Indian Engineering exports for more than 70 years and with its multifaceted approach, has helped Indian engineering exports achieve a remarkable leap, as India grew from a meagre \$10 million engineering export nation in 1950s to USD 116.67 billion (Apr 2024- March 2025). Regarded as a model Export Promotion Council of India by the Union Ministry of Commerce and Industry, EEPC India has emerged as a premier trade and investment promotion organisation, sponsored by the Ministry of Commerce and Industry, Government of India.

Over the decades it has successfully bridged the huge gap between India's Engineering Industry and the Global Export Market running into trillions of revenue, helping to implement the dream of 'India Shining.'

EEPC India is a leader in many respects: It is the First Indian EPC to have an ISO certified website, first in-house Technology Centre and to E-catalogue the product profiles.

As an advisory body it actively contributes in the Government of India's policy making and is the prime conduit between the Indian Engineering fraternity and the Indian Government.

Set up in 1955, EEPC India has around 10,000 members, 60% from MSME sector. It empowers Indian engineering enterprises to navigate international trade complexities and gain growth in an extremely competitive global market.

EEPC India's targeted market research, skill enhancement programmes, and capacity-building workshops, help to equip domestic engineering firms with necessary tools to understand international demand trends, refine product offerings, and meet stringent quality standards.

EEPC India has been organising promotional activities like buyer-seller meets (BSM) and managing 'India Pavilion' at various overseas exhibitions highlighting capabilities of Indian Engineering Industry. INDEE (Indian Engineering Exhibition), and IEES (International Engineering Sourcing Show) are two such flagship events enabling Indian exporters to showcase their innovations to a broader audience, opening doors to new markets
